

Data Center Site Code Cross-Reference

Starting July 1, 2018, Cyxtera will be refreshing our data center site codes to be more intuitive and reflect the connectivity between the facilities on a campus. The campus name will begin with the closest international airport code. A given campus may include multiple data center PODs, or stand-alone facilities with entirely independent electrical and mechanical architecture.

Please note that pre-July 1 invoices included a "ZZ" as part of the original site code. The new site code will no longer include that "ZZ" on invoices going forward.

Please reference the below table to cross-reference the original site codes with the new site codes.
